

Sustainability

AZUMI FILTER PAPER CO., LTD.

We support the Sustainable Development Goals

AZUMI FILTER PAPER committed to sustainability for our environment and society across three pillars: People, Planet and Performance. While embracing our history and culture, we aim to solve environmental and social issues through the development and manufacture of various filters with a strategic vision for sustainability at AZUMI FILTER PAPER for years to come.

As one of the leading filtration media providers, we understand the need for environmentally friendly manufacturing practices and sustainable growth. We look to prioritize efficient natural resource usage in all of our operations to reduce our environmental impact.

- Contribute to ensuring healthy lives for people by providing medical materials such as filter paper for in COVID-19 test kits, and HME(Heat moisture exchanger).
- Contribute to the reduction of energy consumption, filter waste and improve resource utilization efficiency by providing multilayer filter papers with low pressure drop and high efficiency.
- Contribute to the reduction of cooking oil waste and ensuring a food-safety by providing functional filter paper for decoloration and de-oiling of frying oil.
